

# KABILAN K

Full Stack Developer | MERN Stack Developer

+91 9363519020 | [kabilan.fullstack@gmail.com](mailto:kabilan.fullstack@gmail.com) | [www.kabilan.in](http://www.kabilan.in) | [GitHub](#) | [LinkedIn](#) | Chennai, Tamil Nadu

## PROFESSIONAL SUMMARY

Motivated B.E. Computer Science graduate with hands-on experience building scalable full-stack applications using the MERN stack. Skilled in backend development, authentication, REST API design, and user-focused product development. Delivered real-world projects including AI-powered platforms, billing systems, and secure e-commerce workflows.

## TECHNICAL SKILLS

|             |                                                                               |
|-------------|-------------------------------------------------------------------------------|
| Frontend:   | HTML, CSS, JavaScript, React.js, Tailwind CSS                                 |
| Backend:    | Node.js, Express.js, REST APIs, JWT Authentication, Role-Based Access Control |
| Database:   | MongoDB, MySQL                                                                |
| Tools:      | Git, GitHub, Postman, Vercel, Nodemailer, Razorpay, CI/CD                     |
| Additional: | AI Integration, API Testing, Email Automation, Debugging                      |

## PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                               |         |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| Full Stack Developer Intern — Pantech.ai & Novitech R&D Pvt Ltd                                                                                                                                                                                                               | Virtual |
| <ul style="list-style-type: none"><li>Engineered and tested full-stack MERN web applications by designing robust RESTful APIs to optimize frontend-backend integration, while actively managing end-to-end debugging, systematic testing, and deployment workflows.</li></ul> |         |

## KEY PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                           |                              |
